

Federal Support to Combat COVID-19

The federal government remains committed to protecting and supporting communities by providing assistance to localities, states, tribal nations and territories to take action to save lives and protect public health and safety.

Funding under FEMA's Public Assistance Program continues to support COVID-19 testing, vaccination administration, expanding hospital capacity, and surge staffing. This funding is available to states, tribal nations, territories and localities and certain private non-profit organizations. FEMA will continue to provide this important resource to help meet public health and safety needs posed by the pandemic.

Testing

FEMA will fund testing to detect COVID-19 infections. This includes both in a medical setting (primary medical care facilities, temporary medical care facilities, and community-based testing sites) and testing needed to safely open and operate public facilities, including schools and government offices. Funding may be used to support both diagnostic and screening protocols. Funding guidelines for medical settings are outlined in [FEMA Policy 104-010-04, Coronavirus \(COVID-19\) Pandemic: Medical Care Costs Eligible for Public Assistance](#). Guidelines for other facility settings are outlined in [FEMA Policy 104-21-0003, Coronavirus \(COVID-19\) Pandemic: Safe Opening and Operation Work Eligible for Public Assistance \(Interim\)](#). In general, FEMA will fund [diagnostic and screening testing](#) to determine if an active coronavirus infection is present and if an individual should take steps to quarantine or isolate from others.

This funding may include costs for:

- Laboratory testing materials and test kits, including antigen self-tests.
- Contracting for testing support by a third party.
- Testing facilities, including temporary facilities or expansion of space used for testing.
- Staffing to administer tests.
- Training for individuals to administer tests.
- Signage and other communication materials.
- Personal protective equipment and other administrative supplies to conduct testing and technology to register and track testing results.

FEMA

- Mobilization and demobilization of testing activities.
- Facility operating costs (equipment, supplies, security, and cleaning/disinfection).

Hospital Capacity

FEMA will fund medical care to treat people suffering from COVID-19 infections. This includes medical care in primary care facilities such as hospitals, and funding for temporary and expanded medical care capacity. Guidelines are outlined in [FEMA Policy 104-010-04, Coronavirus \(COVID-19\) Pandemic: Medical Care Costs Eligible for Public Assistance](#).

This funding may include costs for:

- Medical care for COVID-19 patients.
- Surge staffing for medical care personnel.
- Expansion of hospitals and medical facilities, such as conversion of unused or other space for clinical care.
- Establishing and operating temporary medical facilities, including lease, purchase, and construction costs.
- Mobilization and demobilization for setting up and closing temporary or expanded medical capacity.
- Operating costs, including equipment, supplies, staffing, and wraparound services.
- Funding may be based on ongoing and projected needs regarding continuing operations at a temporary or expanded medical facility.
- In most cases, permanent renovations are not eligible, except where the work is completed in time to meet COVID-19 capacity needs and is cost-effective. Permanent renovations are also subject to real property disposition requirements.

Vaccinations

FEMA will fund the administration of vaccinations for COVID-19. This includes carrying out vaccination administration for people of any CDC-approved age and boosters. Guidance on funding is provided in [FEMA Policy 104-010-04, Coronavirus \(COVID-19\) Pandemic: Medical Care Costs Eligible for Public Assistance](#).

This funding may include costs for:

- Vaccination facilities, including community vaccination centers, mass vaccination sites, and mobile vaccinations, including necessary security and other services for sites.
- Medical and support staff, including contracted and temporary hires to administer vaccinations.

- Training and technical assistance for storing, handling, distributing, and administering of vaccinations.
- PPE, other equipment, supplies, and materials required for storing, handling, distributing/transporting, and administering vaccinations.
- Transportation support, such as refrigerated trucks and transport security, for vaccine distribution as well as reasonable transportation to and from the vaccination sites.
- Onsite infection control measures and emergency medical care for children and families at vaccination sites.
- Communication efforts that keep the public informed, including messaging campaigns, flyers, advertisements, websites, translation services, community engagement, and call centers or websites to assist with appointments or answering questions.

Frequently Asked Questions

How soon can funding be available?

Organizations should *immediately* take action to save lives and protect public health and safety. If applicants have an immediate need for funding, FEMA can expedite up to 50% of funding needs for medical care and expansion in hospital capacity to eligible applicants with limited documentation required. All entities can apply for FEMA funding through the [COVID-19 Public Assistance Simplified Application](#). Applicants can begin their application by contacting their local, state, tribal nation, and territorial emergency management office or visiting grantee.fema.gov.

Is there a cost-share?

FEMA will fund 100% of eligible COVID-19 costs and will not require non-federal matching funds through April 1, 2022.

Can the National Guard assist?

States may continue to utilize National Guard resources under Title 32 authorizations to support COVID-19 medical care, testing and vaccination activities. FEMA will fund 100% of National Guard costs through April 1, 2022.

How is FEMA ensuring that testing, medical care and vaccination efforts are equitable?

President Biden's *Executive Order on Ensuring an Equitable Pandemic Response and Recovery* requires all states and local governments to focus the use of FEMA funding on the highest-risk communities and underserved populations. State, tribal nation, and territory recipients of FEMA funding are required to ensure that all state, tribal nation, territorial, local, and private non-profit subrecipients are adhering to applicable federal civil rights and non-discrimination laws and equity data requirements. The *DHS Civil Rights Evaluation Tool* provides an overview of what is required to meet civil rights requirements. Each Recipient's FEMA-State Agreement includes specific conditions related to these responsibilities. [FEMA Policy 104-010-04, Coronavirus \(COVID-19\) Pandemic: Medical Care Costs Eligible for Public Assistance](#), includes specific reporting requirements for vaccination efforts.

What if states, tribal nations and territories have outstanding needs for assistance?

States, tribal nations, and territories that have outstanding needs or gaps in what they need to address the ongoing surge in Omicron variant COVID-19 infections should contact their FEMA Regional Office.

How can Applicants learn more about FEMA PA funding?

To learn more about FEMA PA's program, eligibility, and how to apply for funding, please visit [Assistance for Governments and Private Non-Profits After a Disaster | FEMA.gov](#)
